

Hey FCC...stop with the paranoia! The people will go where they can find the things they want. If it's NOT on commercial radio, then they'll go to satellite radio. It's a free country and the NAB should not get in the way of our freedoms. Eddie Fritts should take a pill and chill. The sky is NOT falling Mr. Fritz....it's just bringing forth more choices and a much greater variety for we, the radio listeners, to choose from. Onward and upward for both XM and Sirius!!!
